EDUCATION

Virginia State University |

Expected Graduation Date: May 2028

Bachelor of Computer Science | GPA: 3.8/4.0

Relevant Coursework: Data Structures, Programming II, Object-Oriented Design, Web Development

SKILLS & CERTIFICATIONS

- **Programming Languages:** Python, HTML, CSS, Java, JavaFX, JavaScript
- **Tools and Technologies:** Git, Docker, Github, VScode, Eclipse, IntelliJ, Cursor
- **Certifications:** AWS Certified AI Practitioner (In progress Fall 2026)

PROFESSIONAL EXPERIENCE

STEP program Computer Science Mentor | Virginia State University

June 2026 - July 2026

- **Technical Instruction:** Guided incoming freshmen in learning Python and HTML fundamentals, incorporating prompt engineering and AI tools to accelerate code comprehension.
- **Workforce Readiness:** Taught syntax accuracy, professional communication, and presentation design while onboarding peers to version control workflows using Git and GitHub.

Undergraduate Research Assistant | Virginia State University

September 2026 – Present

- Selected to collaborate with department faculty on upcoming computer science research initiatives focusing on the integration of **Artificial Intelligence** and **Augmented Reality (AR)** architectures.
- Conducting preliminary technical literature reviews on wearable AR smart glasses frameworks and preparing local development environments for upcoming computer vision or spatial data testing.

TECHNICAL PROJECTS

Basketball Shoe Price & Availability Tracker | Personal Project

Summer 2026

- Python script that can access modern store's inventory to and successfully flag if a shoe in the selected size is available.
- Utilizing BeautifulSoup to parse specific HTML label attributes and track item stock. Implemented local version control using Git to stage and commit code checkpoints systematically.

Tic Tac Toe | Personal Project

Spring 2026

- Tic Tac Toe game made using Java. JavaFX was used to design the board layout and user interface.
- Wrote code that correctly identifies gamestates to declare winner, draw, and whose turn it is.

RPG Text Based Game | Personal Project

Spring 2026 - Ongoing

- Used inheritance and polymorphism to create a classic turn based rpg with multiple playable classes.
- Working on designing UI and game systems so that players can customize and progress their characters.
